

ALL FIX®

Universal storage holder

With years of experience in the cleaning industry, WAAK is intimately familiar with the broom storage problems their customers face. We have developed All Fix®, a robust product that meets all requirements and has an attractive additional feature: the design is universal and fits all diameters. This comes in handy when storing a diversity of tools, ranging from cleaning brooms to sports gear. It makes storage much easier and practical.

Private label

All Fix® is a registered brand and model but can be personalised by pad printing or by using customer-specific packaging. WAAK has extensive experience in packaging and can develop any retail or promotional packaging you like.

Features

- Robust
- Fits diameters up to 38 mm.
- Holds max. 4 kg.
- Single All Fix® units: retail packed or bulk.
- 3 All Fix® units mounted on a 50 cm rail or 5 All Fix® units mounted on a 90 cm rail.
- The rails are available in black powdercoated metallic or stainless steel. The stainless steel version is food compliant.
- The All Fix® units are made of recycled plastics.
- Colours: black and white. Customer specific colours on request.
- Personal version and private labelling on request.

CLASSIC PRO

Water reservoir handle

WAAK's new handle with included water reservoir CLASSIC PRO is the result of years of experience in combination with the targeted development of the water reservoir concept designed by WAAK.

Thanks to the handle with water reservoir, mopping and carrying buckets are a thing of the past. Exact dosing leads to a perfect result with a very small amount of water, making the product a perfect ecological and economical tool that meets the highest requirements.

The handle with water reservoir is also attractive from an ergonomic point of view. The integrated water reservoir makes the handle agile. The unique filling system allows for horizontal positioning under the water tap.

Features

- Water filling system is seamlessly integrated in the grip and comes with a lock button.
- Reservoir 360° watertight, volume: 0.5 L.
- Reservoir can be opened by simply rotating the button, without removing it.
- Reservoir can be filled up in a horizontal position.
- Optional structural powdercoating ensures a perfect grip and avoids fingerprints.
- Adaptable to your connection system.
- Easy to store with our All Fix®.
- Private labelling on request.

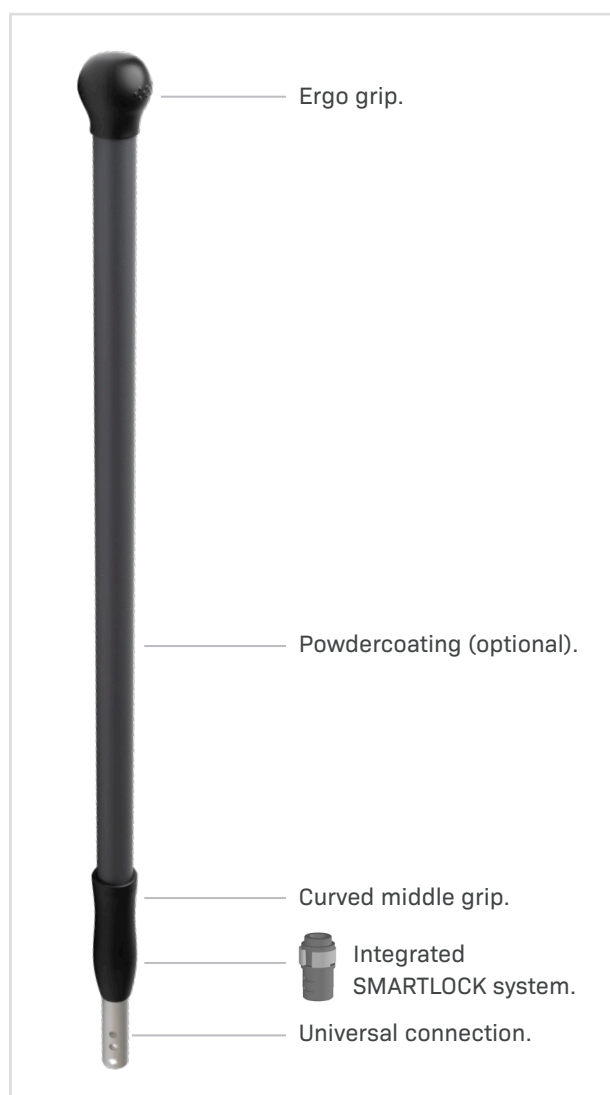

ERGO Telescopic handle

The ERGO telescopic handle was developed with a view to optimum ergonomics. Depending on the individual wishes of the user, the length can be adjusted while mopping.

The rotational properties of the curved ergo grip contribute to ergonomic use. The aluminium alloy and the nature of the production process ensure excellent rigidity. Combined with the lightweight design this makes the ERGO telescopic handle convenient to use.

Features

- Adjustable in length and lockable thanks to the integrated SMARTLOCK system. A quarter turn is enough to lock and release the system.
- Powdercoating (optional): improves the insulating factor as well as the grip. The structured surface avoids visible fingerprints.
- The universal connection makes the handle compatible with most accessories.
- Available in both a two- and three-piece telescopic version, allowing for super compact storage in a trolley, for instance.
- Easy to store with our All Fix®.
- Private label options available such as labels, printed logos and even customised colours.

PROFESSIONAL Telescopic handle

The PROFESSIONAL telescopic handle is equipped with a curved grip. This grip has an excellent hold thanks to the anti-slip design, and is available with blue or white plastic components.

The aluminium anodised handle comes in a ribbed design for a better grip. The aluminium alloy and the nature of the production process ensure excellent rigidity. Combined with the lightweight design this ensures comfortable use.

The shaft is adjustable in length and can be locked with an external nut lock. The nut lock can be opened and closed in a single motion and guarantees good fixation. A quarter turn is enough to lock and release the system.

Features

- Available in both a two- and three-piece telescopic version for maximum reach.
- Available with different connection systems such as universal and wire cones.
- Can be used with different accessories.
- Easy to store with our All Fix®.
- Available with white or blue components.
- Private label options available, such as labels, printed logos and even customised colours.

SMARTLINE Handle

SMARTLINE handles are developed with a view to maximum standardisation of components and materials. The anti-slip design of the curved grip affords a good hold.

Features

- Available in anodised aluminium and fibreglass.
- Available with HACCP colour coding.
- The universal connection makes the handle compatible with most accessories.
- Easy to store with our All Fix®.
- Private label options available such as labels, printed logos and even customised colours.

Anodised aluminium handles

The handle consists of a high-quality anodised aluminium tube made in the EU. The aluminium alloy and the nature of the production process provide excellent rigidity. Combined with the lightweight design this ensures comfortable use.

SMARTLINE Telescopic handle

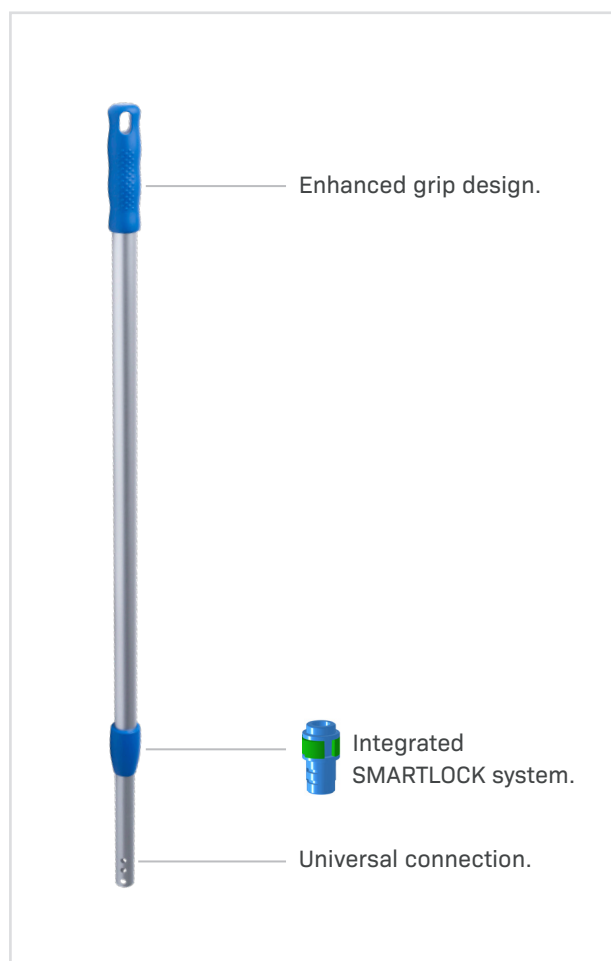

The SMARTLINE telescopic handle was developed with a view to achieve the best compromise between ergonomics, efficiency, simplicity and cost-savings. Depending on the individual wishes of the user the length can be adjusted while mopping.

The aluminium alloy and the nature of the production process ensure excellent rigidity. Combined with the lightweight design this ensures efficient use.

Adjustable length with the integrated SMARTLOCK system to suit your individual height. This system uses the same technical principle and provides the same quality as our premium ERGO handles. A quarter turn is sufficient to open or lock the system.

Features

- The universal connection makes the handle compatible with most accessories.
- Available in a two-piece telescopic version.
- Adjustable in length and lockable thanks to the integrated SMARTLOCK system. A quarter turn is enough to lock and release the system.
- Easy to store with our All Fix®.
- Private label options available, such as labels, printed logo, in-mould logo etc.

WATER FED POLE

Aluminium water fed handle

The WATERFED pole comes with an integrated waterfed system and is equipped with a curved grip. This grip has an excellent hold thanks to the anti-slip design and is available with blue or white plastic components.

The aluminium alloy and the nature of the production process ensure excellent rigidity. Combined with the lightweight design this ensures efficient use.

Features

- Aluminium handle, diameter: 22-26 mm
- Variable length (telescopic):
2x 150 cm / 2x 200 cm / 2x 300 cm
- Adjustable cleaning angle
- Two-piece ribbed

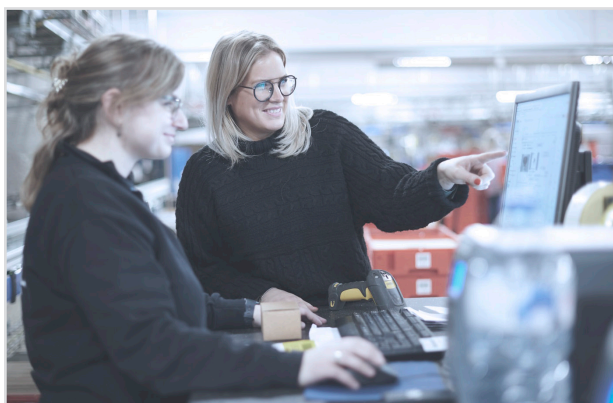

WAAK, a social enterprise

WAAK is a social enterprise with a vision. Based on the belief that every person is entitled to develop their abilities, we strive to develop opportunities specifically for those who find themselves at a distance from the labour market. Since 1965, we have catered to the needs of this target group by creating permanent jobs.

We enter into **long-term partnerships** with our customers as well. Not only does this allow us to work with a focus on the future, we can also make the difference as a supplier. Moreover, WAAK believes not only in a **social** but also in an **ecological** economy. we realise this by engaging in **circular** collaborations and in projects that contribute to a cleaner world.

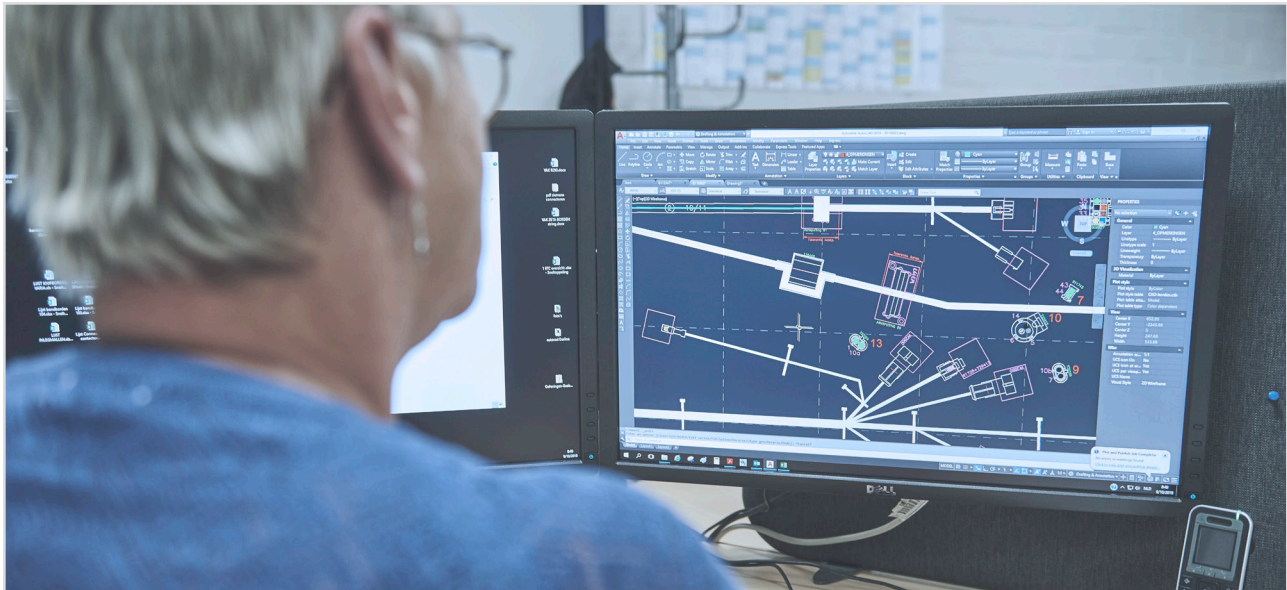

Activities & products

WAAK's activities can be divided in four majour clusters:

1. Industrial assembly
2. Mounting work
3. Packing work
4. A wide range of on-location services, within which en-clave working holds a prominent place.

Willow fences, private label cleaning tools and young plants are some of WAAK's own products.

Why work with WAAK?

We ensure an optimum partnership. Performance, reliability, efficiency, know-how and a wide range of services. At WAAK, everything is housed under a single roof. Add to this our **strong customer focus** and **future-driven** approach and you get an attractive, state-of-the-art overall package.

OUR UNIQUE SELLING POINTS

- 1. The high degree of reliability with regard to quality and delivery.** We implement a very intensive quality programme: camera recognition, exhaustive testing, poka-yoke systems, systematic spot checks. At WAAK, zero defect output takes on a new meaning. Moreover, thanks to our close monitoring of timings we have built a reputation for exceptionally reliable deliveries.
- 2. WAAK, as a total solution provider.** Far more than merely a supplier, WAAK is also a high-performance partner that supports the customer wherever necessary: through automation in a high-tech machine park, through co-engineering in building specific installations, through supply chain monitoring, inventory management, transport, just-in-time deliveries, etc. As a provider of total solutions, we can be your partner for industrial assembly, manual mounting, packing work and external

services such as maintenance or enclave working. At WAAK you'll find everything under a single roof. And for anything we don't have in house, we look for a suiting alternative.

- 3. The character of WAAK as an organisation and as a commercial partner.** WAAK is a sustainable company. Social and ecological commitment go hand in hand with a strong economic vision. The jobs, the products we create, the partnerships we enter into: at WAAK, everything is oriented towards the long term.
